

re: rejection of previous e-mail, cinfirmination nr. 20026165777282---not sure why
previous was rejected--as per docket nr. 02-98: i support sub-bands on proposed
band(5 mhz.). i support 200 watt output maximum on said band--equal 50 khz.
segments seem equitable--
hope the FCC can see it's way clear to protect the amateur who does more with
less--this is true amateur spirit-- thank you--
